Venkata Sravani   -   191CS223

Kruthika K Sudhama   -   191CS224

V Madhan Kumar   -   191CS260

Vinesh S Talpankar   -   191CS265

Project Description:

An open platform for all the events, boot camps, webinars from all the colleges to extend their reach and for students to register for various events. The University/Club admin must register on the platform to post the events held by their college. Users can use various filters/tags like Free or paid events, colleges, duration of the event to search for events. Users can also integrate their google calendar to keep track of the events they have registered for.

Target Audience

- Students/ Scholars or anyone looking to attend events from all over the world.
- Clubs and organizations looking for audience and reach.

How is it helpful for people?

- We can reduce browsing for the events in different websites
- This helps the colleges to get more students for their events and have interactive discussions
- Reminding users about their registered events.
- We provide calendar for the events as an interface to view large number of events

Features:

- Registration as an Admin or User
    1. Admin for Colleges or Clubs (whoever are hosting the events)
    2. Users (someone registering for events)
- Filters/tags like free/ paid/ colleges/ clubs / date/ topic to search for events effectively.
- Event Registration and Posting
- Calendar Integration (An add to google calendar/ phone calendar option) for Users.
- Overview of all events displayed as a list (when an event is clicked , it redirects to that event page)
- Subscribe to a particular channel ie a College or club so that the User gets notified when an event is posted.
- Event List and Statistics like number of registrations and subscribers are available for Admins.

Web/App Pages

- Home page
- User
    1. User Login/SignUp Page
    2. Calendar with all the events and a search bar.
    3. Event Registration page.
- Admin
    1. Admin Login/SignUp Page
    2. Posting/Updating an event

Additional Features(if time permits):

A course recommendation system, view/ upload handwritten notes.
